International Training Course:

INTENSIVE Training Course

for Full-endoscopic Operations of the Lumbar Spine

Organizers:

Richard Wolf Academy in co-operation with Center for Spine Surgery and Pain Therapy Center for Orthopedics and Traumatology of the St. Elisabeth Group - Catholic Hospitals Rhein-Ruhr St. Anna Hospital Herne/Marien Hospital Herne University Hospital/ Marien Hospital Witten and Institute for Anatomy, University Hospital Essen

April 3rd - 5th 2017

Germany – Herne / Essen

Program

General notes

Dear Colleagues,

The therapy of degenerative diseases of the spine carries with it medical and socio-economic problems. After conservative measures are exhausted and where there are exacerbated pain conditions or neurological deficites, a surgical procedure may become necessary. Despite good therapy results, consecutive damage may ensue due to traumatisation. It is therefore of particular importance to optimise these procedures on a continuous basis. The goal we should strive for is the minimization of surgically induced traumatisation and negative long-term consequences, taking into account the existing quality standard.

Minimally invasive techniques can reduce tissue damage and its consequences. Endoscopic operations demonstrate advantages which have raised these procedures to the standard in various medical areas. On the lumbar spine, as a result of the development of the interlaminar and lateral transforaminal access, the spinal canal with its adjoining structures can be reached full-endoscopically. Technical problems have been solved by special rodlens endoscopes with a large intra-endoscopic working channel and appropriate instruments. Working under a continuous stream of liquid offers options which have proved their worth in arthroscopic surgery through long experience. In the area of the cervical spine anterior or posterior access is possible.

During the training course we intend, in a reciprocal exchange with yourselves, to try to demonstrate the current and future options as well as problems, risks and complications of fullendoscopic operations in the area of the spine. In an environment of practical demonstration where you perform access routines on cadavers yourself, typical practical experience for your expected learning curve or future clinical application can be gathered. Under intensive tuition by instructors, each participant will perform the various access routines on a practical level and run through special working procedures. For this reason the number of participants is limited. Nevertheless, the training course cannot replace the acquisition of the necessary extensive knowledge.

Dr./med.

Dr. med. Martin Komp

Priv.-Doz. Dr. med. habil Sebastian Ruetten

1 st /	3 rd	Monday / Wednesday at Institute for Anatomy, University Hospital Essen

11:00 h	Welcome and introduction
(3 rd day: 09:00 h)	D. Goethel

INTENSIVE Cadaver Workshop – Part I:

- 11:15 h Practical exercises for participants Full-endoscopic Operations of the Lumbar Spine: Extraforaminal / transforaminal access Moderation / Instructors: D. Goethel, International Instructors
- 14:00 h Lunch

INTENSIVE Cadaver Workshop – Part II:

- 14:20 h Practical exercises for participants Full-endoscopic Operations of the Lumbar Spine: Interlaminar access Moderation / Instructors: D. Goethel, International Instructors
- 16:45 h Final discussion
- 2nd dayTuesday at St. Anna Hospital, Herne08:00 hRegistration08:15 hWelcome and introduction
M. Komp, S. Oezdemir, S. Ruetten
- 08:45 h Clinical consultation **Full-endoscopic Operation of the Lumbar Spine** *M. Komp, S. Oezdemir, S. Ruetten*
- 15:00 h Final discussion

Course Location:

1st / 3rd day (Monday / Wednesday):

Institute for Anatomy, University Hospital Essen Virchowstrasse 171, 45147 Essen

2nd day (Tuesday):

Center for Spine Surgery and Pain Therapy, Center for Orthopaedics and Traumatology of the St. Elisabeth Group -Catholic Hospitals Rhein-Ruhr, St. Anna Hospital Herne Hospitalstraße 19, 44649 Herne, Germany
